Bleed Area

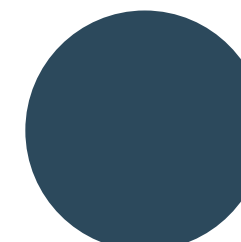

Extend your background images or colour right to the edge of the bleed area. This area is trimmed off so your artwork doesn't print with an unwanted white edge.

Cut Line

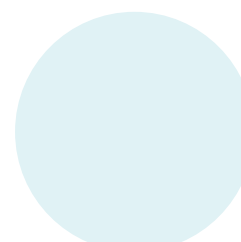

This is where we cut your design to the finished size, ready for it to be made up and dispatched. Anything placed outside this line will be cut off.

Safe Zone

The safe zone is 30mm inside the cut line. Keep all main text and images inside the dark border so nothing gets cut into or cut off during printing and finishing.

Pop-Up Wrap Around

Beyond this area the fabric curves around the frame. Anything in the smaller white panels won't be visible from the front and will sit on the sides.
